Colorado, Utah and Wyoming 7 Day Precipitation
 9 - 15 March 2015

Colorado, Utah and Wyoming Month to Date Precipitation
 1 - 15 March 2015

Colorado, Utah and Wyoming February 2015 Precipitation as a Percentage of Normal

Colorado, Utah and Wyoming Water Year 2015 Precipitation as a Percentage of Normal
 October 2014 - February 2015

The images above use daily precipitation statistics from NWS COOP, CoCoRaHS, and CoAgMet stations. From top to bottom, and left to right: most recent 7-days of accumulated precipitation in inches; current month-to-date accumulated precipitation in inches; last month's precipitation as a percent of average; water-year-to-date precipitation as a percent of average.

Last Week Precipitation:

- The Upper Colorado River Basin was dry the past week seeing less than 0.10" over most of the basin.
- The northern portion of the Upper Green River Basin in Sublette, Lincoln and down into Uinta counties in WY and Summit County in UT saw up to 0.25" with an area up to 0.50" in Lincoln County.
- The San Juan Mountains in southwestern CO saw an area of up to 0.50" as well.
- East of the Divide was dry as well, with all of the plains east of I-25 seeing no precipitation for the week.
- Up to 1.00" fell in parts of Jefferson, Park, Clear Creek, Gilpin, Boulder and western Larimer counties. Some of this precipitation spilled over the divide into Summit County as well.
- The San Luis Valley was dry with less than a tenth of an inch of precipitation.
- The eastern Sangre de Cristo Mountains in Costilla, Huerfano, Custer and Fremont counties saw areas between 0.10 and 0.25" with a few spots seeing up to 0.50".

February Precipitation:

- February was variable over the UCRB with above normal precipitation over the Green river basin and Four corners and dryer than normal conditions in the Duchesne, Yampa, White, Colorado and Gunnison basins.
- The headwaters of the Upper Green river basin saw normal to above normal moisture for February.
- The driest areas were NE Utah and NW Colorado where less than 70% of normal precipitation fell, particularly over lower elevations. The high country also struggled in the northern basins.

<http://climate.colostate.edu/~drought/>

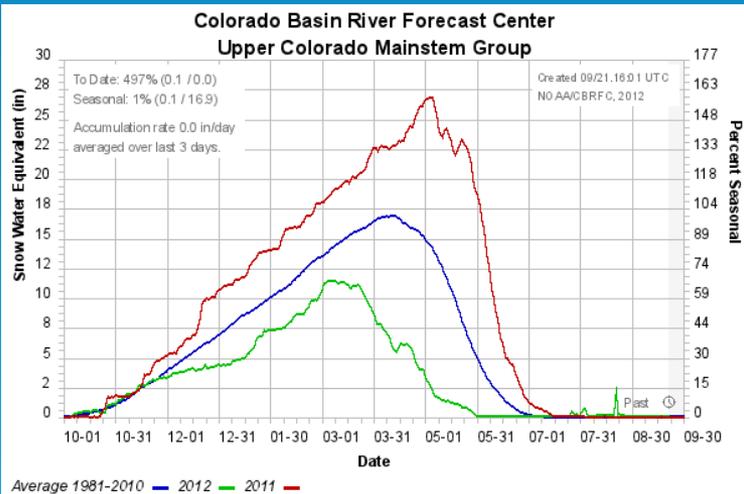

50-90% of normal precipitation fell over Logan, Sedgewick and Northern Washington as well as SE Yuma

Local and Regional Expertise

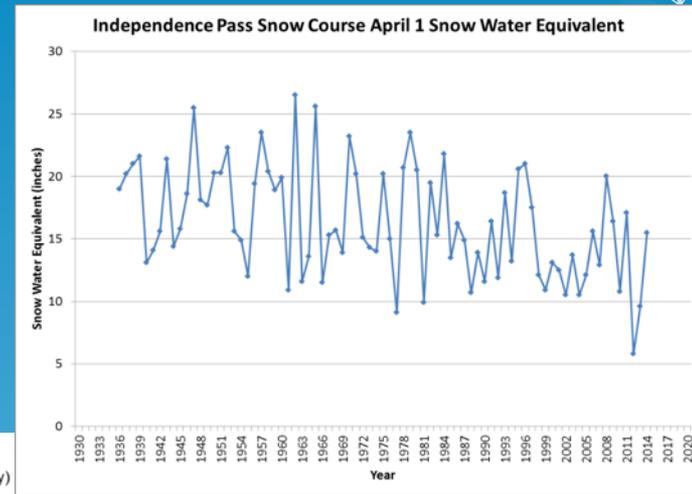

- Federal, state and local agencies provide updates on current conditions.
 - USGS puts streamflow data into context.
 - NWS provides weather forecasts
- Regional experts provide less frequent, but desirable updates.
 - CBRFC provides water supply and peak flow forecasts. We refer folks to CBRFC forecast webinars.
 - Klaus Wolter provides long range climate outlooks.

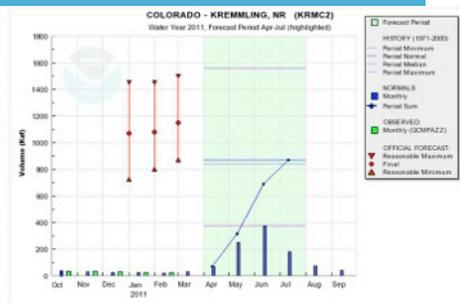

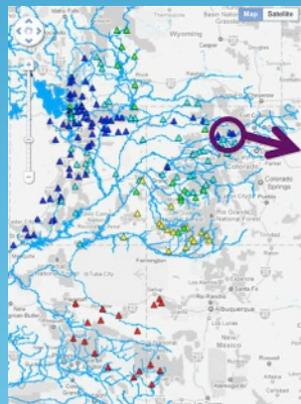

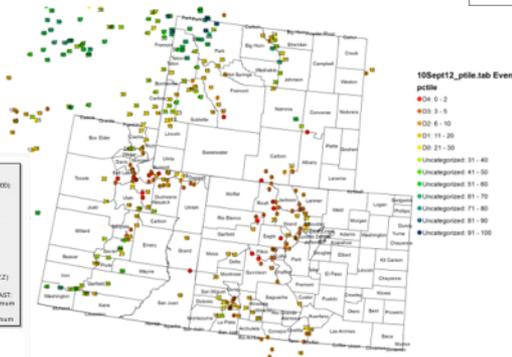

Snowpack and runoff monitoring

SWE is essential to drought monitorin

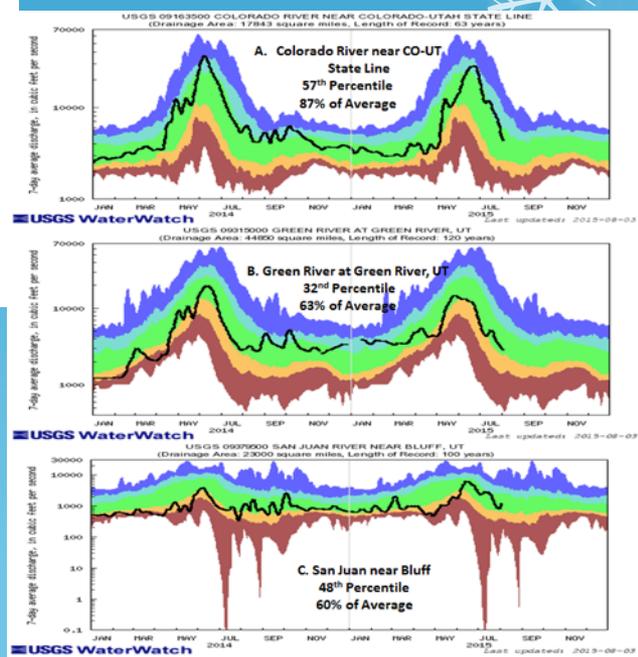

Snotel Water Year Precipitation Percentile Ranking for 10 September 2012 (Stations with 15+ years of data only)

Seasonal Water Supply Forecast

1150 kaf 50% Exceedance (Official Forecast)	162.4% of Historical Median	132.2% of Historical Mean
870 kaf 90% Exceedance	1500 kaf 10% Exceedance	1st of 6 Official Historical Flows

Forecast Issued: Mar 1 2011

Weekly Drought and Water Assessment Webinars

- During critical times of year (Feb – July or times of major drought), weekly webinars are held at 10AM on Tuesday.
 - ~ monthly through the rest of the year
- Normally 15-20 are on the call and the USDM sometimes joins
 - Greater attendance with long range climate outlooks/streamflow forecasts.
- Approximately 30 minutes, covering precipitation, snowpack conditions, streamflow, reservoir levels, evapotranspiration, soil moisture and NWS forecast.
- Ends with open discussion from all participants on recommended USDM changes

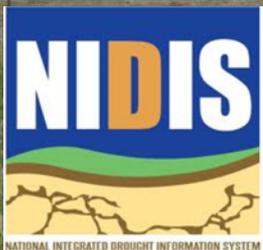

Weekly Drought and Water Assessment Webinars

- Content is dynamic as conditions change
- Farm Service Agency and Extension contacts have been very useful for on the ground crop and grazing conditions
 - i.e. Does VegDRI depiction represent what is being observed on the ground?
- After the call, summaries are sent out to a the entire list
- Suggestions and feedback are encouraged!

**If interested, we can put you
on our weekly update list**
